

CSCI 12562- Project

Instructions

In this project you will build a moderate-size Web site. Each group will have 8 members, and each member should contribute equally to the project

General Requirements

- Website should have **minimum** 5 pages
- Each of those pages should use same or similar style, so that the pages look like they belong to the same website.
- Each page should have meaningful **titles**
- Save the home page with the name, **index.html**
- All the web pages should have meaningful file names
- Create **CSS**, **images** and **js** folders in order to store those different files (Use the relative paths to access the files inside those folders)

Technical Requirements

- You should have a consistent navigation, for example if you have a menu which links to different pages, the menu should appear in the same place in all pages, so that users can easily find the menu and be able to navigate to different pages.
- You should use one CSS external stylesheet, and optionally internal styles in different pages according to the requirements.
- You should organize all the pages in a good structure.
- You should layout your web pages using <div> technique.
- If you want to use a layout which did not introduce in the class, that's OK. But, the layout can't be too simple.
- Your pages should be easy to read, easy to navigate
- You should have enough text and at least 10 images in your website. You're also encouraged to add some multi-media contents (audio, video etc.) if you want.
- You should have **at least** one table and **one form** in your website.
- **Validate the form using javascript**
- Make the web site dynamic by using JQuery (You must use JQuery in your web page at least for **one** aspect)
- You're allowed to use some CSS techniques or scripts developed by others, only in the circumstances that you adopted and modified it to fit your website. Copying is not allowed
- Don't submit something which is not considered good even on your own standard.
- You are not allowed to use any templates (built in web sites)
- You must use proper indentation in every web page
- You are allowed to use web development frameworks (Ex: Bootstrap)
- **Include JavaScript to add dynamic behavior to your site.**
- **Try to use JS Date at least in one page.**

Project Titles

1. Online Library system
2. Online train ticket reservation
3. E-channeling web site
4. Online vehicle booking system
5. Online job searching web site

Submission

Include the student number of each Group Member's in a separate .txt file to identify the group members clearly. **In addition, the contribution of each group member to the project must be clearly stated in a separate contribution Word document and included in the submission folder.** You should compress all your files into a zip (.zip) file and name like "**project_<group-number>.zip**". Assignments should be submitted on or before the date mentioned on the assignment.

You are not allowed to submit any other persons work downloaded from the internet. If plagiarism or cheating is identified a **zero mark will be given for the assignment to all students involved**. This policy is strictly enforced. You should upload the solution in the created folder in Moodle on or before the due date.
